Salary Loss By Department

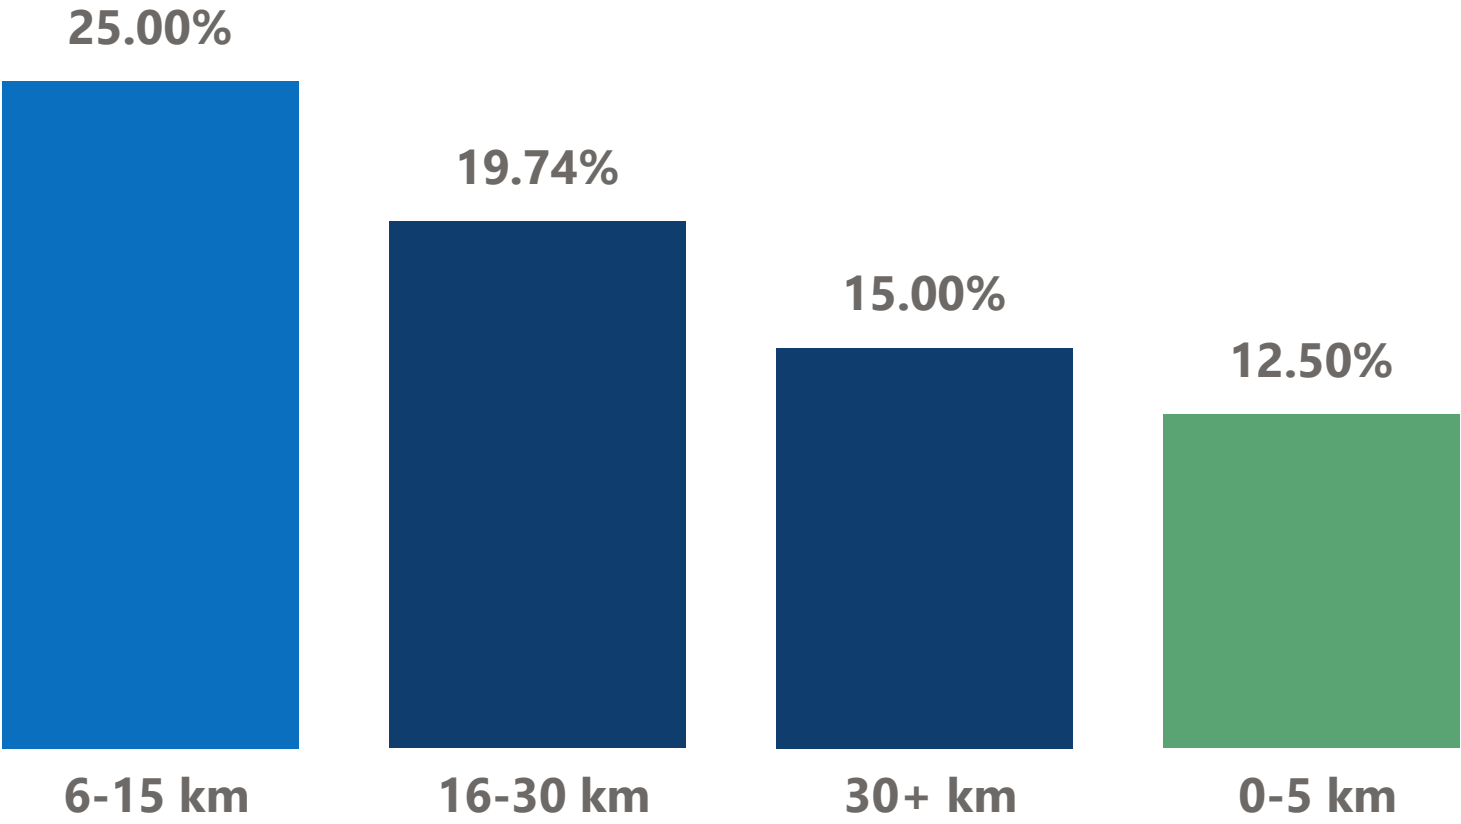

Attrition by Department

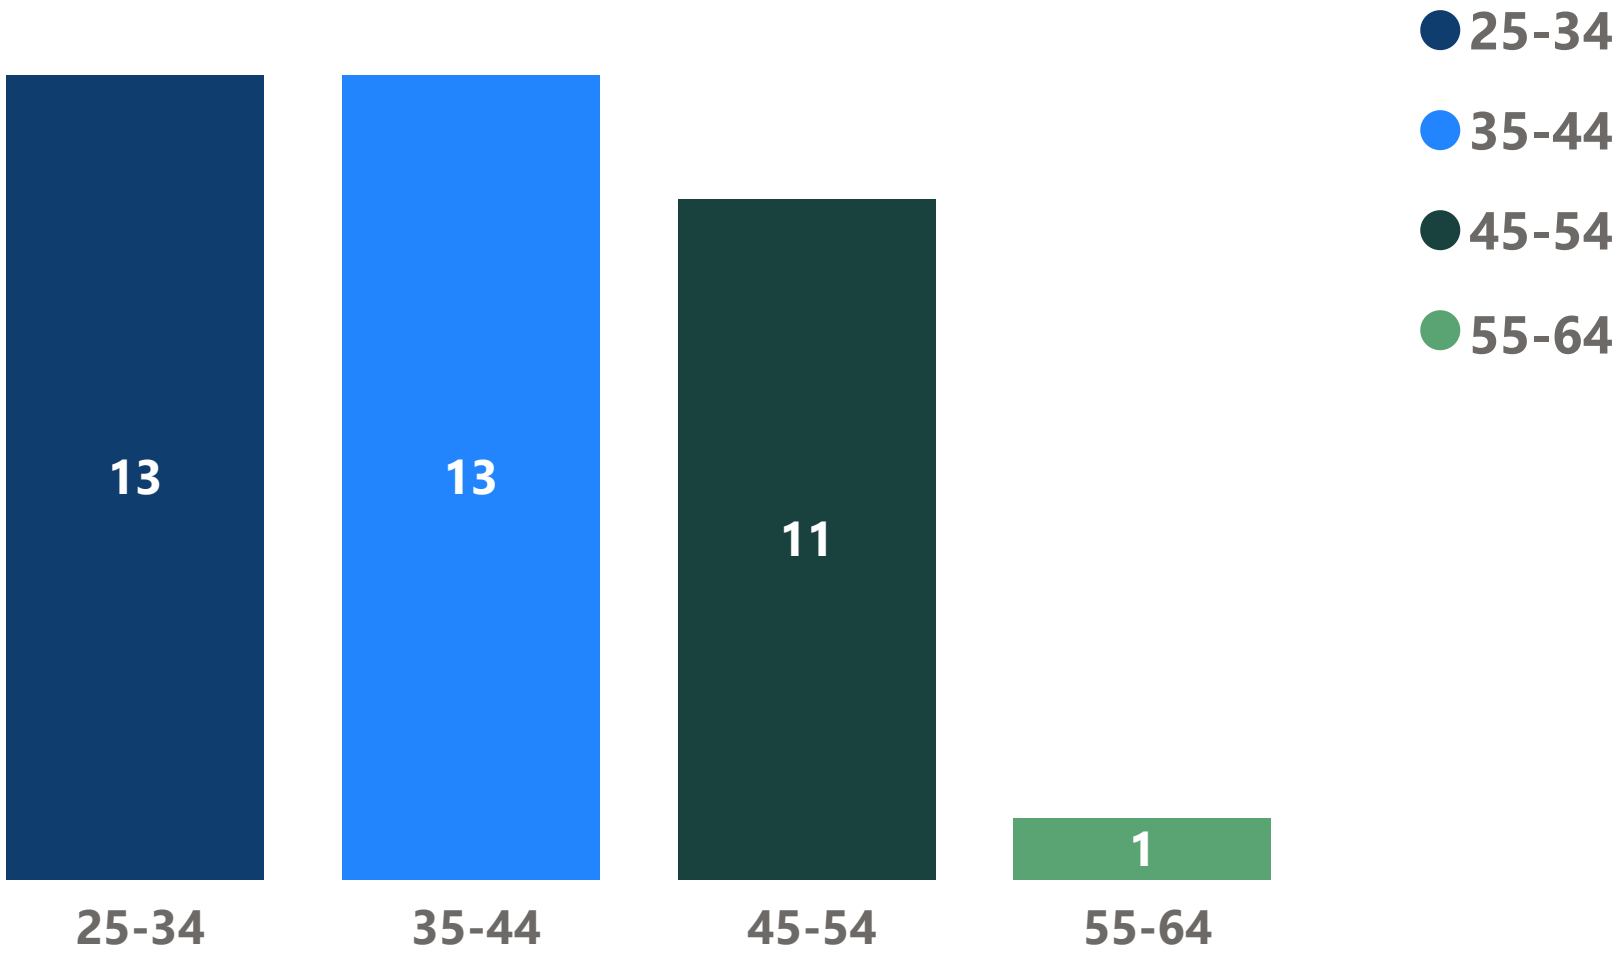

Forecast - Attrition

Attrition Rate by Distance

"Attrition peaks among employees commuting 6-15 km (25%), while both very short (0-5 km) and long-distance (30+ km) commuters show lower attrition — suggesting distance alone isn't a linear driver of attrition."

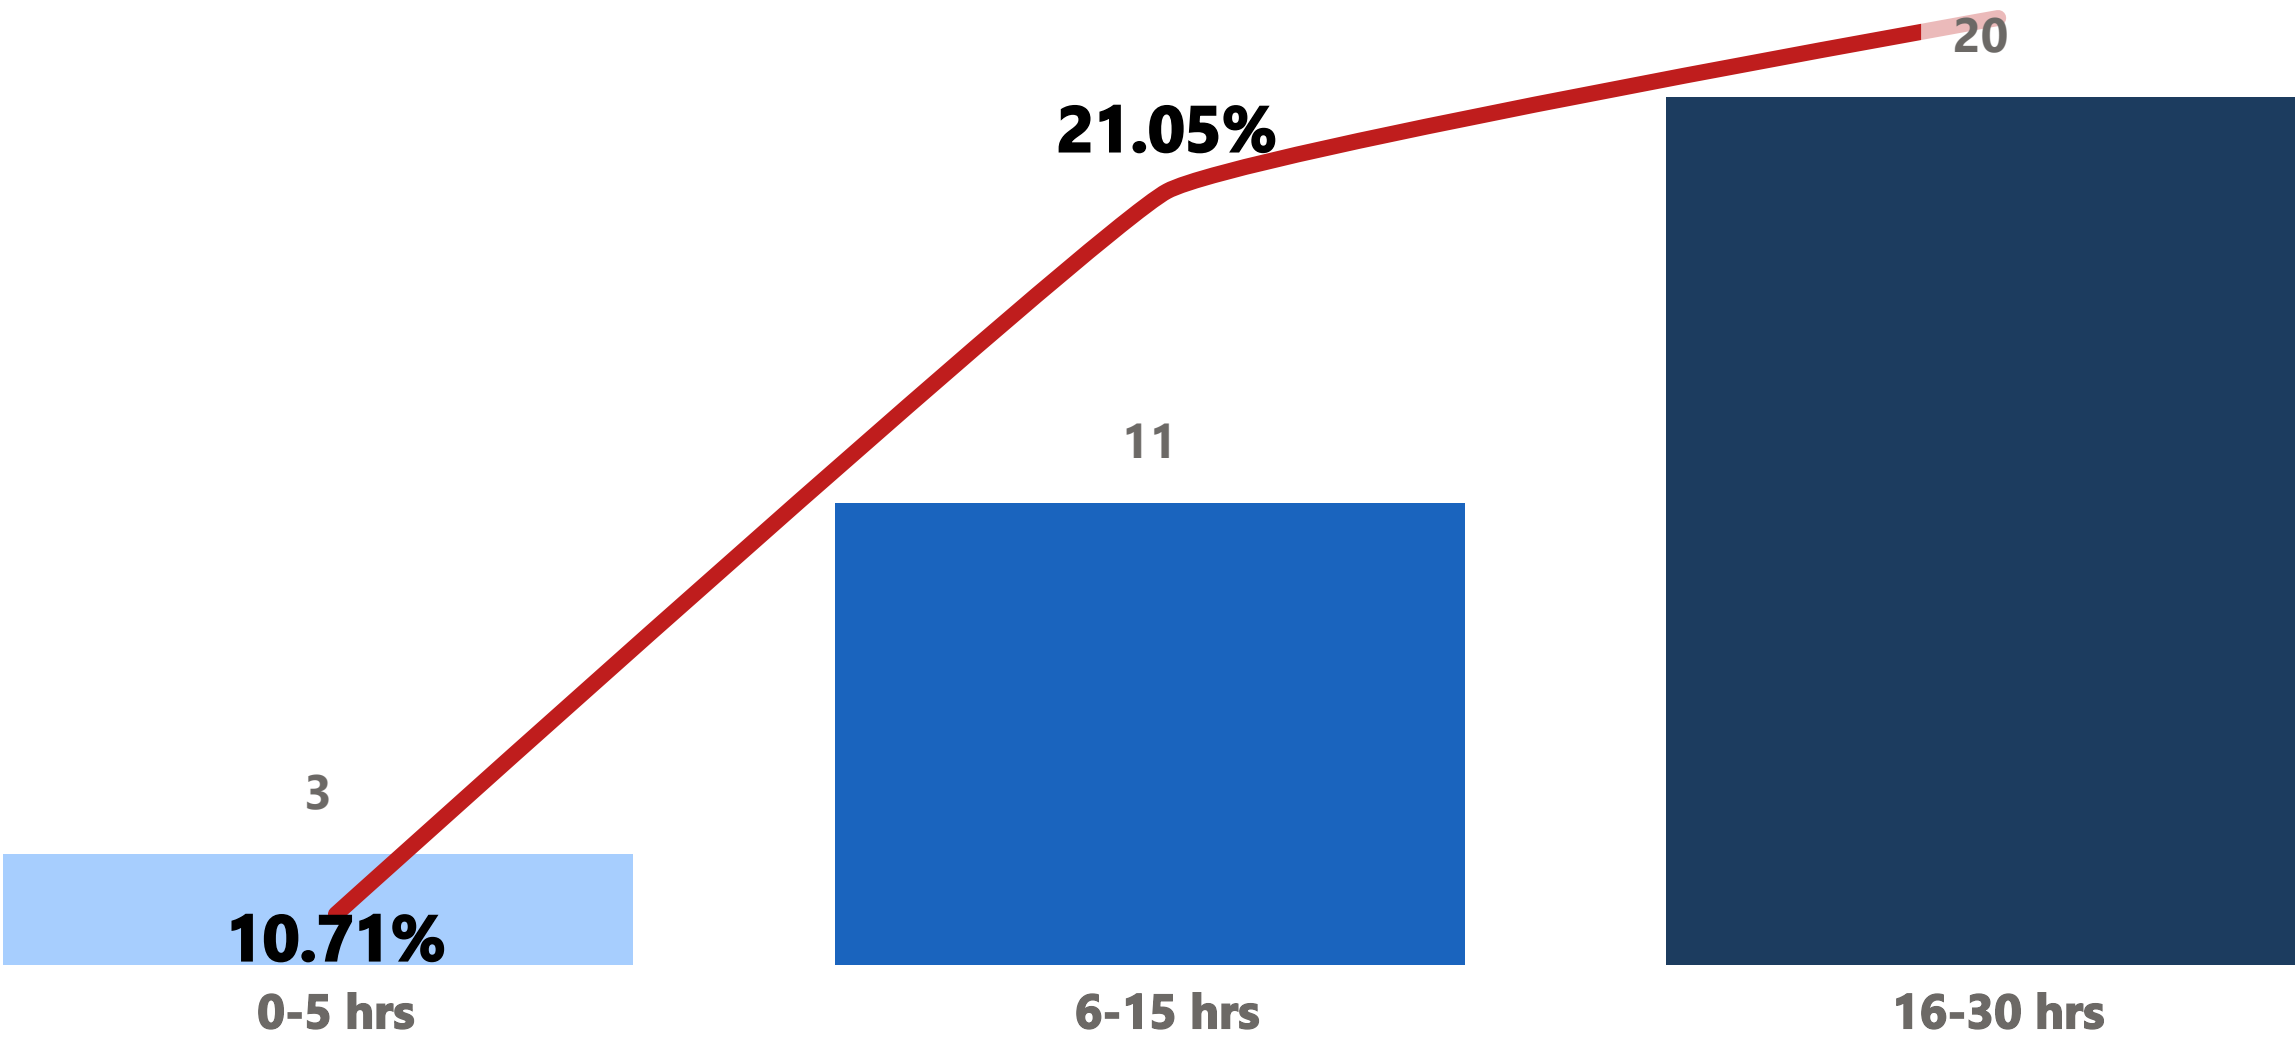

Attrition in Age group

Avg overtime hours and Attrition Rate by Overtime Band

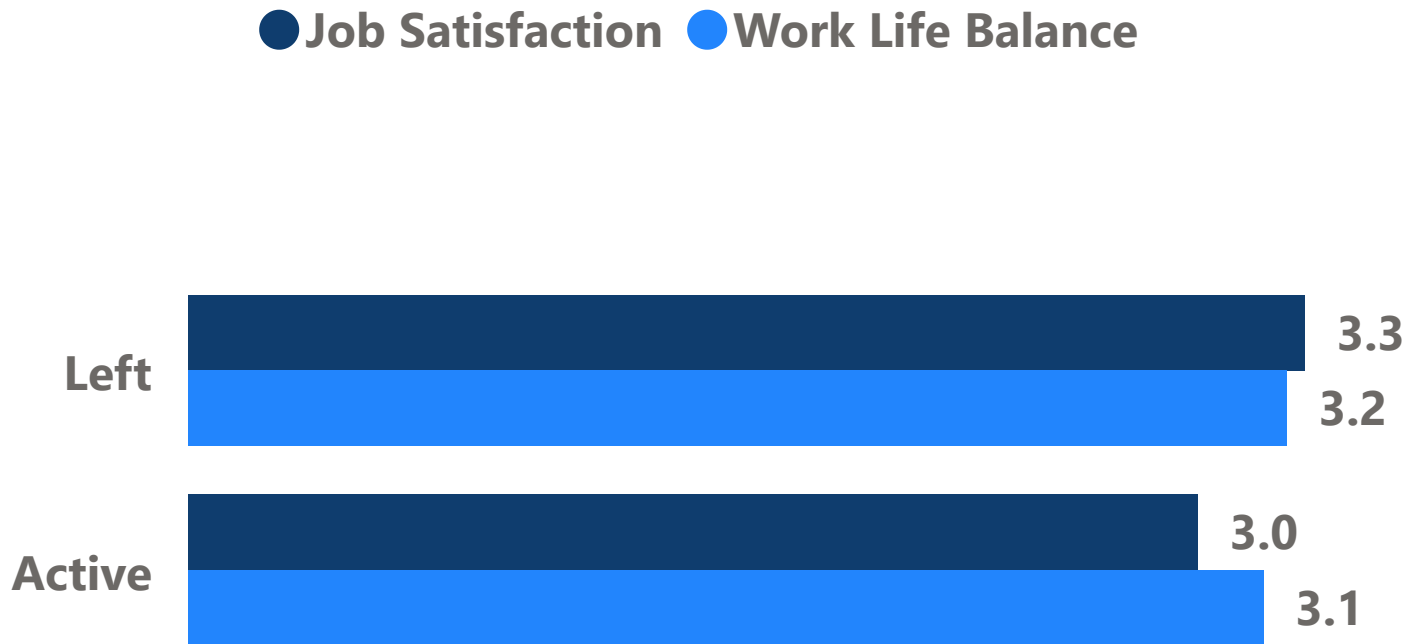

● Avg overtime hours — Attrition Rate

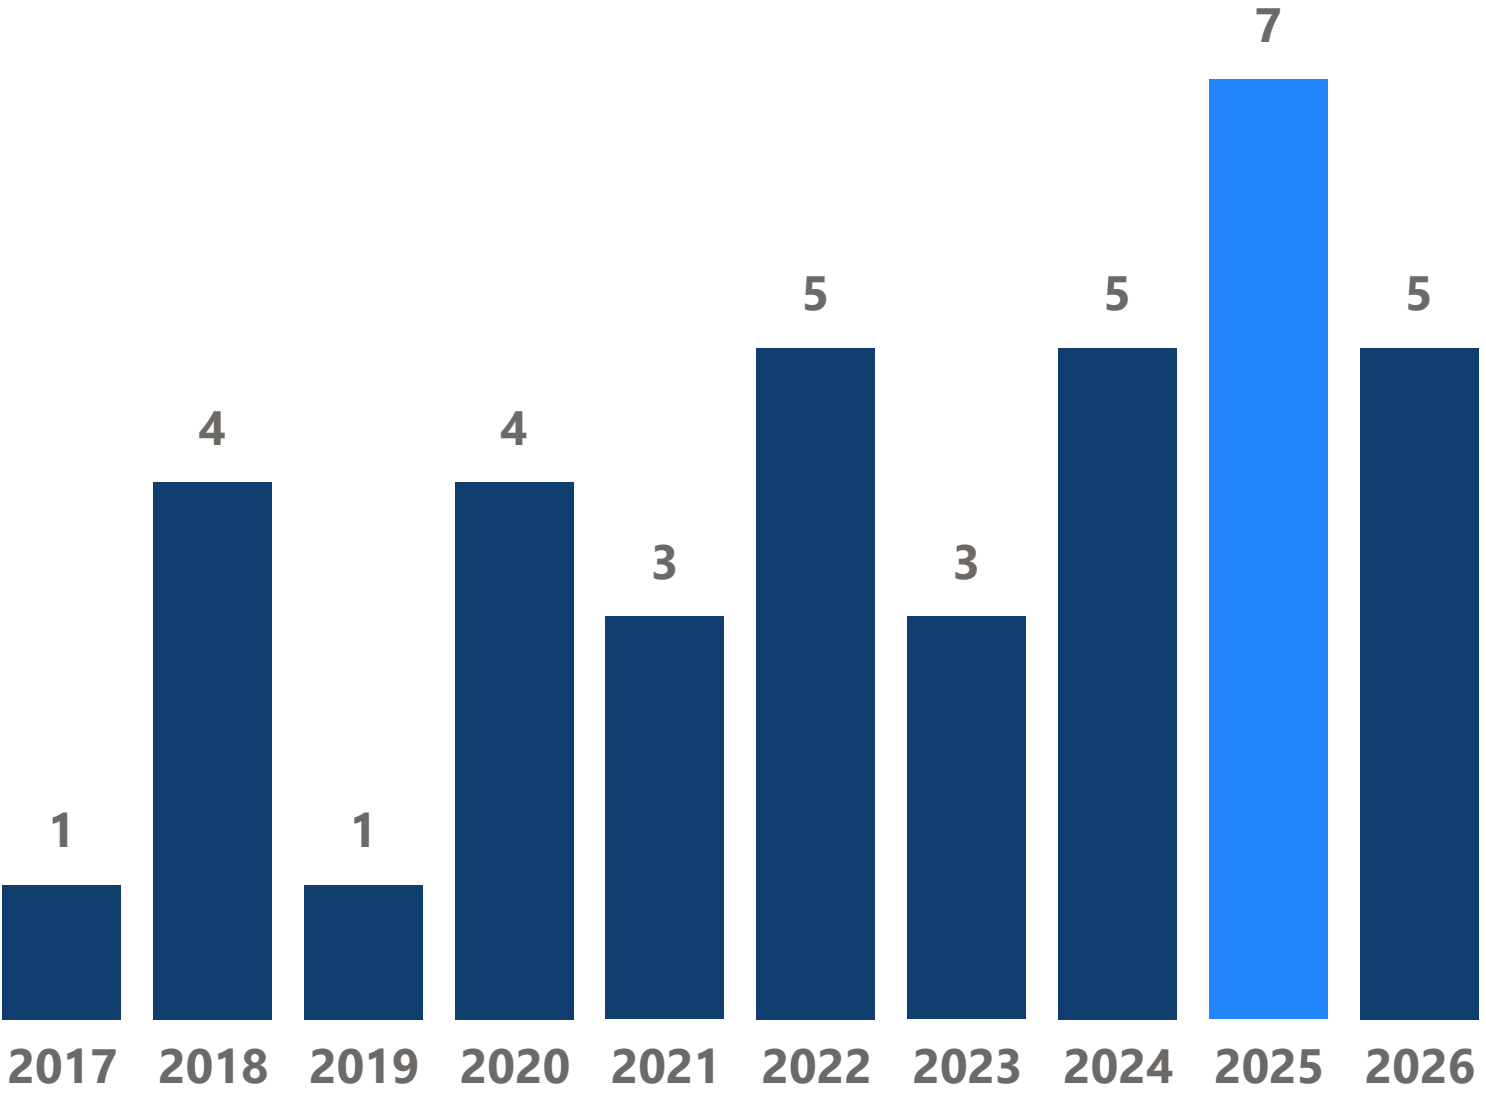

"Attrition rises sharply with overtime — employees averaging 16-30 hrs of overtime per month show a 23.5% attrition rate, more than double that of employees with minimal overtime (10.7%). This suggests overtime/burnout is a stronger attrition driver than commute distance."

Job Satisfaction and Work Life Balance by Employment_Status

"Attrition is not strongly driven by dissatisfaction — leavers reported slightly higher satisfaction scores, suggesting other factors (compensation, growth, external offers) may be key drivers."

Anaya Kumar	Engineering	Senior Engineer	3	42	2	5	22

"10 active employees currently meet 3 or more attrition risk factors, with Engineering accounting for half of them. These employees show consistently high overtime (16-24 hrs/month) and low satisfaction scores — flagging them for immediate retention
